

Addendum # 1

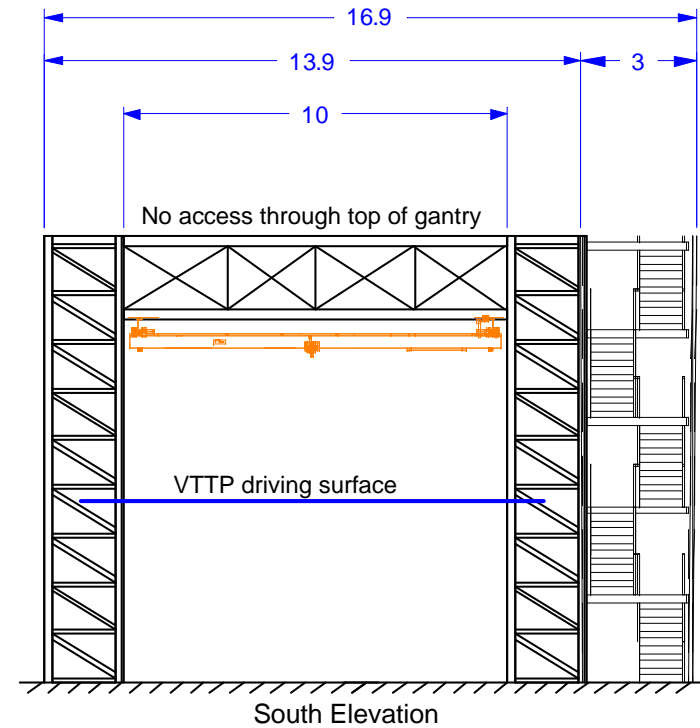

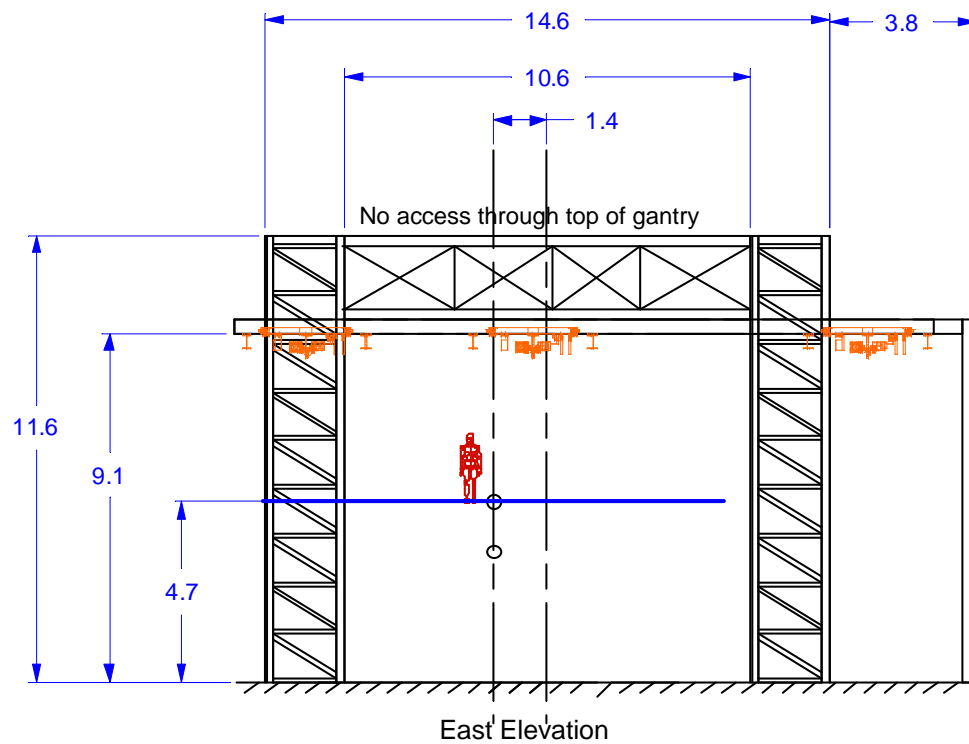

RFP No. JC-2663-599415

(April 22, 2005)

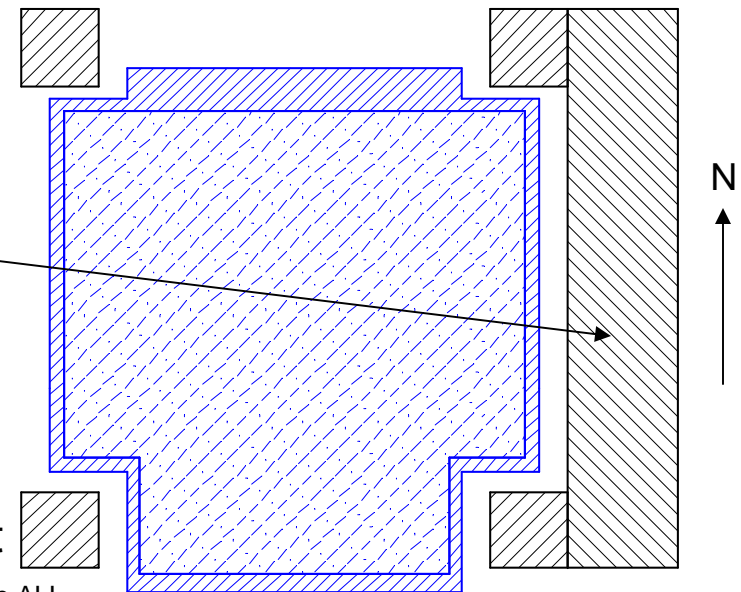

Except as specifically modified herein, this RFP remains unchanged. Proposers are reminded that the receipt of this addendum and all addenda must be acknowledged on Attachment A-1 to The RFP when submitting the final proposal.

This addendum is to identify the cost and schedule impact between the installation of the VTTP with and without the gantry structures in place. Please provide cost and schedule information for the two scenarios listed below:

- 1 The VTTP site is prepared such that the foundation is complete with all negotiated interfaces ready for installation of the VTTP. No other TDT structures are in place. Figure 2 illustrates the approximate site layout. Note that in this scenario none of the other structures will be present at the time of VTTP assembly.
- 2 The VTTP site is prepared such that the foundation is complete with all negotiated interfaces ready for installation of the VTTP. The gantry structure including stair tower, control booth and bridge crane are installed onto the foundation prior to VTTP installation. Note: the 5 ton bridge crane will not be available for VTTP assembly usage except under limited, negotiated circumstances. Figures 1, 2 and 3 illustrate the approximate gantry configuration and site layout.

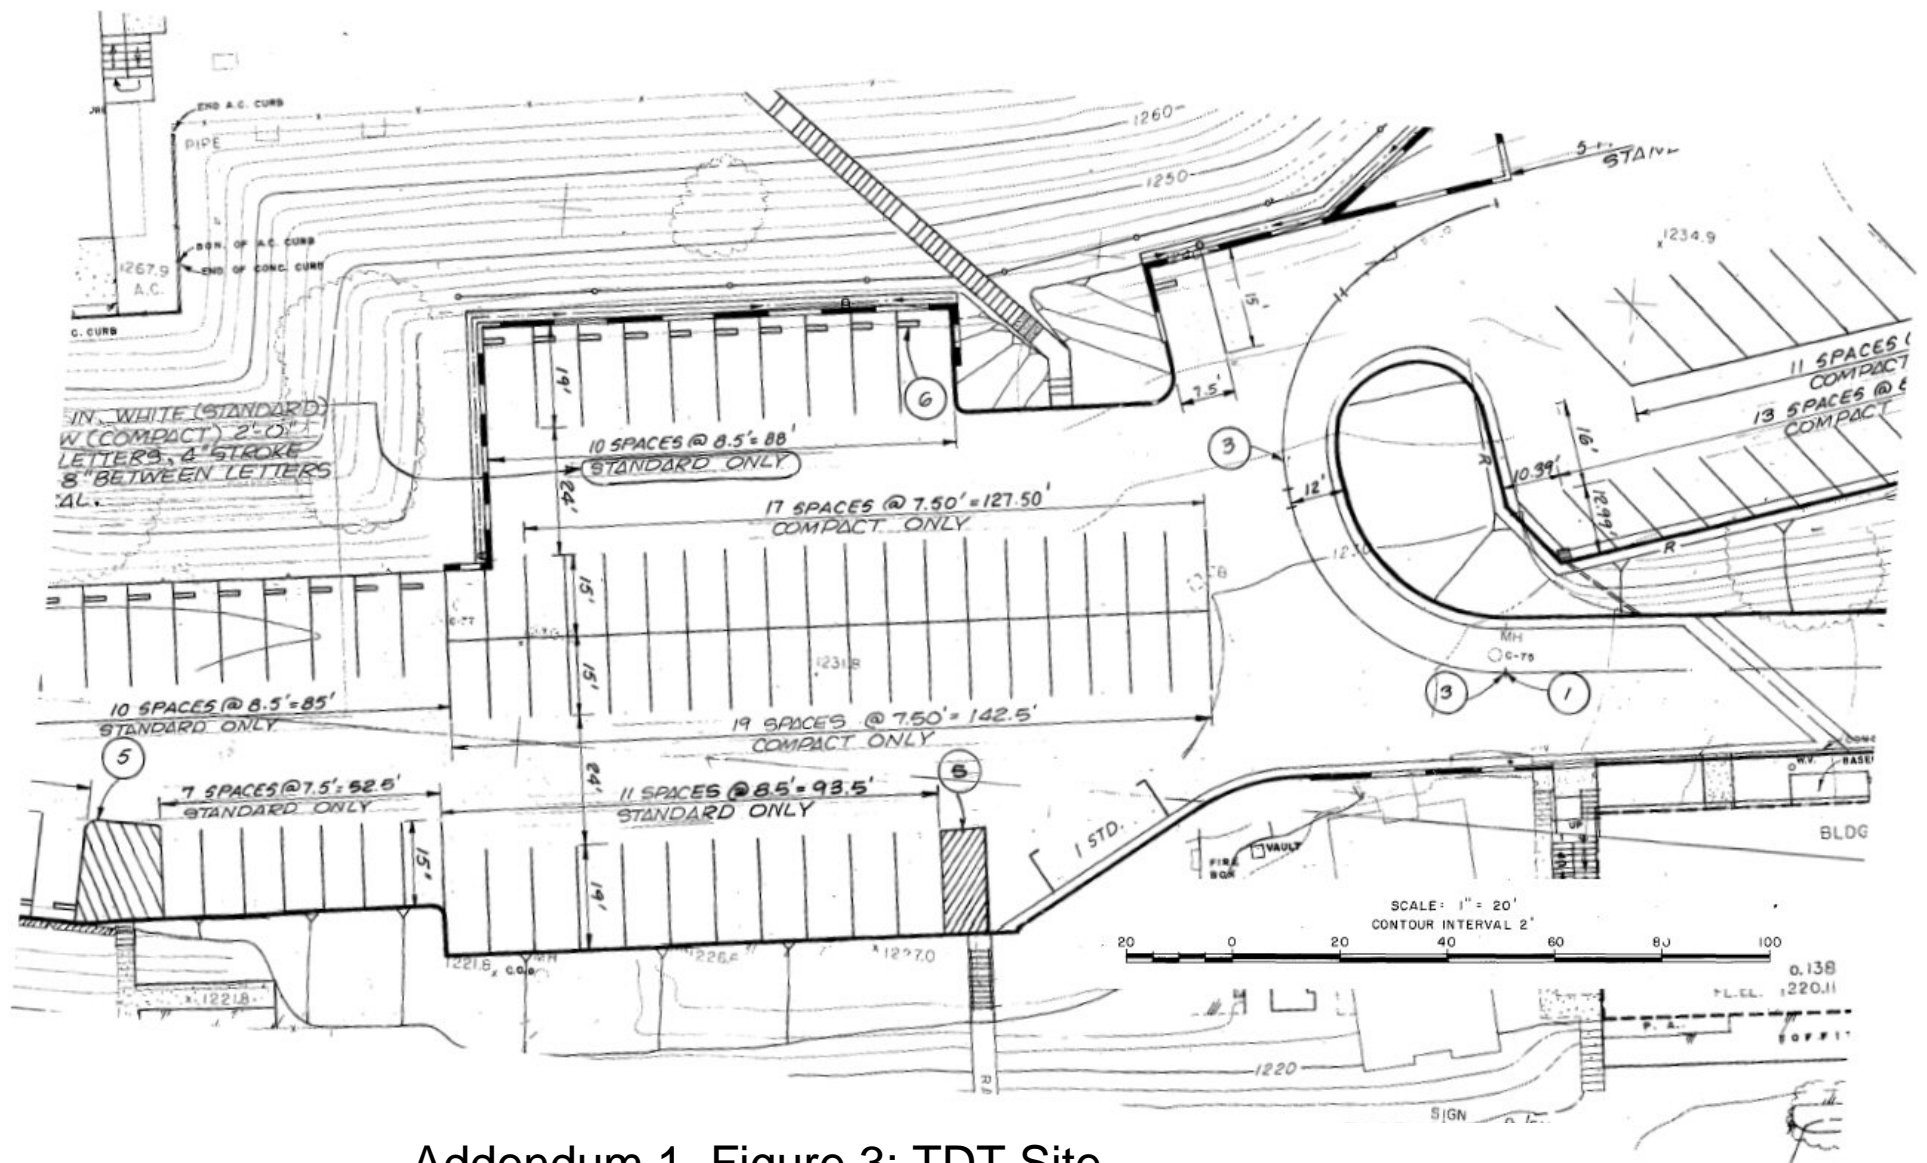

Approximate footprint of stair tower and control booth

Addendum 1, Figure 1: Approximate Gantry Layout

Approximate gantry configuration to be used in planning the on site assembly activities: Note ALL dimensions are approximate and subject to change, overall configuration will remain constant.

All units in meters

Addendum 1, Figure 3: TDT Site
